first published in 2005 this book represents the first full length biography of john phillips one of the most remarkable and important scientists of the victorian period adopting a broad chronological approach this book not only traces the development of phillips career but clarifies and highlights his role within victorian culture shedding light on many wider themes it explores how phillips love of science was inseparable from his need to earn a living and develop a career which could sustain him hence

questions of power authority reputation and patronage were central to phillips career and scientific work drawing on a wealth of primary sources and a rich body of recent writings on victorian science this biography brings together his personal story with the scientific theories and developments of the day and fixes them firmly within the context of wider society

this is the first book to examine how romantic writers transformed poetic collections to reach new audiences in a series of case studies michael gamer shows romantic poets to be fundamentally social authors working closely with booksellers intimately involved in literary production and resolutely concerned with current readers even as they presented themselves as disinterested artists writing for posterity exploding the myth of romantic poets as naive unworldly or unconcerned with the practical aspects of literary production this study shows them instead to be engaged with intellectual property profit and loss and the power of reprinting to reshape literary reputation gamer offers a fresh perspective on how we think about poetic revision placing it between aesthetic and economic registers and foregrounding the centrality of poetic collections rather than individual poems to the construction of literary careers
